Export performance of BHEL

2170. SHRI SHANKER SINH VAGHELA: Will the Minister of INDUSTRY AND COMPANY AFFAIRS be pleased to state:

(a) what has been the export performance of BHEL during the last three years; and

(b) what are the details of the export performance and the reasons for its decline, if any?

THE MINISTER OF STATE IN THE MINISTRY OF INDUSTRY AND COMPANY AFFAIRS (SHRI ARIF MOHD. KHAN): (a) The value of exports of BHEL during the last three years 1982—85 was Rs. 6212 lakhs.

(b) The value of exports of BHEL during each of the last three years was as under:

. . . . (*Rs. in lakhs*)

	Value of exports
1982-83	3026
1983-84	2735
1984-85	451

The following are among the reasons for decline in the exports:

(i) Against a capacity of about 1,30,000 MW the world over, the orders placed in the last five years has been around 25000/30000 MW only on an average, giving rise to a global recession.

(ii) Developing countries who are in need of power equipment, expect substantial amounts of credit to be offered by suppliers at low rates of interest and with long repayment periods. Industrialised countries are offering mixed credit packages where part of the equipment cost is covered by aid and the balance against low interest credit. The amount of such aid or low interest funds available to Indian companies is very meagre, with the result that they are not able to offer attractive mixed credit packages to the prospective customers, matching offers made by competitors.

2171. (Transferred to the 22nd August 1985).
